EDUCATION

Florida International University

Miami, FL

Bachelor of Science in Mechanical Engineering, GPA: 3.6/4.0

Jun. 2026 – Apr. 2029

Relevant Coursework: Programming for Mechanical Engineers, Calculus II, Secure C Programming, CAD, Computer Tools for Engineers

Activities & Organizations: Students for the Exploration and Development of Space (SEDS), CyberClaws, SHPE

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS, R

Frameworks: React, Node.js, Flask, JUnit, WordPress, Material-UI, FastAPI

Developer Tools: Git, Docker, TravisCI, Google Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse

Libraries: pandas, NumPy, Matplotlib

EXPERIENCE

Avionics Bay Mechanical Designer

Sep. 2026 – Present

Students for the Exploration and Development of Space (SEDS), FIU

Miami, FL

- Design the **electronics bay for FIU's IREC competition rocket**, integrating and protecting flight avionics within the vehicle
- Develop **mechanical layouts and mounting configurations** around avionics and vehicle structural requirements
- Collaborate with the **Avionics and Vehicle Structures & Dynamics teams** to coordinate interfaces and ensure reliable electronics integration

Founder & President

Aug. 2026 – Present

CyberClaws, Florida International University

Miami, FL

- Founded and lead **FIU CyberClaws**, a cybersecurity organization focused on hands-on technical development, competitions, and career growth
- Lead **weekly cybersecurity workshops** covering CTFs, Linux, networking, Nmap, Wireshark, Hydra, Gobuster, and web security
- Manage a **4-person executive board** and prepare members for **CCDC and CPTC** collegiate cybersecurity competitions

Technical Curriculum Developer

May 2026 – Present

Maximize Education

Miami, FL

- Develop **engineering and coding curriculum** delivered to high school students and schools nationwide through Infento and Riders programs
- Create **hands-on STEM lessons, programming activities, and technical projects** for classroom use
- Build and manage course content within the **LMS**, integrating coding exercises, digital resources, and technical learning materials

Technology Sales Associate

Aug. 2026 – Present

PantherTECH, Florida International University

Miami, FL

- Assist students, faculty, and staff with **selecting computers, accessories, and technology products** based on their technical needs
- Provide **technical product guidance and customer support**, helping customers compare devices, specifications, and features

PROJECTS

Medalzalic V1 – VTOL TVC Rocket | *Teensy 4.1, C/C++, Onshape, OpenRocket* June 2026 – Present

- Design a **VTOL thrust-vector-controlled model rocket** targeting a roughly **30 ft ascent and controlled landing**, using separate ascent and descent propulsion stages
- Develop the flight-control system around a **Teensy 4.1 programmed in C/C++**, integrating gimbal control, onboard electronics, sensing, and flight-computer functions
- Design a **gimbaled E16 propulsion system** with an **ABS gimbal assembly** and **PLA nose cone**, while evaluating mass, stability, packaging, and structural constraints in **Onshape and OpenRocket**

Fred | *Raspberry Pi 5, Linux, Python, C/C++, Local LLMs* Nov. 2023 – Present

- Develop a **Raspberry Pi 5-based handheld platform** combining cybersecurity, engineering, networking, and system-analysis tools in a portable Linux environment
- Build a **custom local AI assistant** that interprets technical output, supports diagnostics, and assists with cybersecurity and engineering workflows without relying on cloud services
- Evaluate **quantized local LLMs**, including **Qwen-based models**, while optimizing memory usage, inference performance, and usability on constrained embedded hardware
